

Finding A Professional Mediator

What is Mediation?

Mediation is a process in which two or more parties involved in a disagreement work with an impartial third party, the mediator, to generate their own solutions to solve the dispute. Unlike a judge or an arbitrator whose decisions subject one party to win and the other party to lose, mediation is about finding a solution that works for both parties.

Court-Ordered or Voluntary

Court-Ordered: A judge has ordered the parties of a case to attend mediation and make a sincere effort to resolve the case

Voluntary: Parties decide they want to attend mediation voluntarily to resolve issues more quickly

How Can Mediation Benefit Me?

- Mediation can make the process quicker, less expensive and non-adversarial
- Mediation gives the power to the parties, instead of the court
- Professional mediators have the experience and the training which will allow the parties to work through their issues towards a satisfactory resolution
- Mediation can make the outcome of the dispute more amicable
- Mediation can be used in numerous types of cases:
Family/Divorce • Will/Probate • Elder Care •
Consumer/Debt • Business/Contract • Labor •
Medical/Insurance • Family • Neighbors •
